

A Beginners Guide!

Got a Green Machine and not sure where to start? No worries! Let me explain you the basics :)

First things first:

So the first thing to know is that every different type and size of hardware/fixings will have their own die, and most will also need a hole cut with a hole cutting die. If you are going to be using any hardware with a post (press studs, rivets, magnetic clasps) then you're going to need a 3mm hole cutter! This is a great one to get first as it will be used frequently across different fixings.

3mm Hole Cutting Die

Onto Hardware:

Now that you have your 3mm hole cutter, you need to decide what hardware you would like to use. The three most popular hardware's with a post are:

3mm Hole Cutting Die

8mm Double Cap Tubular Rivets

8mm Double Cap Tubular Rivet Die Set

3mm Hole Cutting Die

14mm Magnetic Clasps with Rivets

14mm Magnetic Clasps with Rivets Die Set

3mm Hole Cutting Die

15mm S Spring Press Studs

15mm S Spring Press Studs Die Set

If you would like to use eyelets, this is where things change! Key info: we measure our eyelets by the size of the HOLE not the overall diameter. So, depending on you eyelet size, you will need the hole cutter, the eyelet, and the eyelet die all in the same size! The most popular eyelet size is 6mm, if you go for this size, you will need...

6mm Hole Cutting Die

6mm Brass Eyelets

6mm Eyelet Die Set

Tutorials to get you started:

Head over to YouTube and search 'Trimming Shop' you will then find our page. Click on this and you will see a mini search bar, within this you can search for the hardware you are using and watch a tutorial on how to use them!!
