

Step-By-Step Guide

Magnetic Claps with Prongs

What you need:

- Magnetic Claps with Prongs
- Magnetic Claps with Prongs Die Set
- A felt tip marker
- A scalpel
- The Green Machine

In the same size

Step one:

Decide where on your fabric you would like your magnetic clasp with prongs to go and with your felt tip, mark this on the fabric.

Step two:

Use your scalpel to create two slits in your fabric where you have marked for them to be. Take your magnetic clasp and push the prongs through the two slits ready to be fixed.

Step three:

Put the matching base die to magnetic clasp into the bottom of your Green Machine and screw the top die in above. Put your backing plate over the prongs and gently push the prongs to flatten them slightly.

Step four:

Slowly but firmly press your Green Machine handle down to secure the magnetic clasps with prongs in place.

Step five:

Repeat the process for the other side of your magnetic clasp and you are done!
