

4.5mm-6mm

# Mesh Eyelets

W\_EY-BRS-P

We measure our Eyelets by the size of the **HOLE**, not the overall diameter.

The overall diameter is likely to be around 2-4mm larger than the hole, depending on how big you go.

You need your hole cutter to match the size of your Eyelets. If you buy 6mm Mesh Eyelets then you will need the 6mm hole cutter! Try placing some corrugated cardboard under your fabric to give the hole cutter something to bite into.

## Hole Cutting Die

## Mesh Eyelet Die Set

Search: W\_EY-MESH-DIE-G-P

You will need the matching Mesh Eyelet Die Set, **ALSO** in the same size. In this example, you already have the 6mm Mesh Eyelets, the 6mm hole cutter and now you need the 6mm Mesh Eyelet Die Set! Place the barrel face down onto the bottom die, lay your fabric on top and place the washer on top with the ridge facing up!
