

# Step-By-Step Guide

## Star Studs with Pins

### What you need:

- Star Studs with Pins
  - Star Stud Die Set
  - The Green Machine
- In the same size

### Step one:

Place the base of your star stud die into the bottom of your Green Machine and screw the top die in directly above.

### Step two:

Drop the pin into the base die (spike facing up) and push your star stud into the top die (face up).

### Step three:

Place your fabric inbetween your two dies and slowly but firmly press your Green Machine handle down to secure.

### Please note:

You will not need to cut a hole to fix star studs as the post will pierce through the fabric itself.

So that you can feel the hole on the bottom as you push the star in, ready for the pin.
