

# Eyelets with the hand tool set

## Step By Step Guide

### Step One:

Take your fabric on a self-healing cutting mat and use your hole cutting hand tool and a small mallet to create a hole in your fabric.

### Step Two:

Place your grommet on the anvil face down and lay your pre cut hole over the grommet. Then place your washer on top with the ridge facing up.

### Step Three:

Use the pointy side of your eyelet hand tool and fit it inside your eyelet. Keeping the hand tool straight, use your mallet to hammer it down to fit the eyelet.

### Top Tips:

Make sure that you keep your hand tool straight up to ensure your eyelet is fit correctly.
