

# Oval Eyelets

10mm-40mm

W\_EY-OVA-50-P

We measure our Eyelets by the size of the **HOLE**, not the overall length.

The overall length is likely to be around 4-7mm larger than the hole, depending on how big you go.

You need your hole cutter to match the size of your Eyelets. If you buy 10mm Oval Eyelets then you will need the 10mm oval hole cutter! Larger holes will require more force to cut. Try placing some corrugated cardboard under your fabric to give the hole cutter something to bite into.

## Oval Hole Cutting Die

## Oval Eyelet Die Set

Search: W\_OVA-DIE-P

You will need the matching Oval Eyelet Die Set, **ALSO** in the same size. In this example, you already have the 10mm Oval Eyelets, the 10mm oval hole cutter and now you need the 10mm Oval Eyelet Die Set! Place the barrel face down onto the bottom die, lay your fabric on top and place the washer on top with the ridge facing up!
