

Rivets with the hand tool set

Step By Step Guide

Step One:

Take your fabric on a self-healing cutting mat and use your hole cutting hand tool and a small mallet to create a hole in your fabric.

Step Two:

Take the base of your double cap rivet and push it through the hole you have cut. Take the cap and push it onto the post.

Step Three:

Lay your double cap rivet on the anvil and take your hand tool. Place your hand tool over the cap of the rivet, holding it straight, use your mallet to fix them together.

Top Tips:

Make sure that you keep your hand tool straight up to ensure your double cap rivet is fit correctly.
